

**DEVELOPING  
THE BRAIN**

*lasting changes  
for all ages*

# Making Connections with Gill Brooksmith

**Full Colour  
Manuals and  
International  
Certificates**

## The RMT courses are ideal for...

Ots, PTs, SI and Speech and Language Therapists, Developmental Optometrists, Parents, social workers, caregivers, family Health therapists and providers.

Classroom teachers, SENCOs, nursery and preschool teachers.

Kinesiologists, Brain Gym instructors and Body therapists

- Understand how the reflexes impact on your clients
- Use simple yet profound protocols to resolve underlying issues
- OTs 22 hours CPD. Physio's: Reflexes related to: Dyspraxia Behavioural issues, Low tone, ADHD, Autism,
- Senco's: An eye opener as to why children behave the way they do. Support them with tools that work with the cause.

**Ideal  
for anyone  
interested in  
learning and  
development**

### **Pre-requisite: None**

This 2-day course looks at how the brain develops from the bottom up and creates the connections between the hindbrain, midbrain and forebrain so that the prefrontal cortex establishes the ability to coordinate actions, feeling and thoughts.

Learn the basics of Rhythmic Movement Training (RMTi) and how it relates to building neurology and neural maturity.

Topics Include:

- Gaining a thorough knowledge and how to do/ use all the Passive, Active and Sitting/kneeling movements to stimulate the brain connections
- Finding out which parts of our brain need to link up to promote co-ordination, to process auditory and visual information, to have the ability to sit still, to manage our emotions, **learn from experience and Making the Connections** to areas important for focus, attention, comprehension, movement, coordination and memories
- Stressors that effect neural development.

**'It is an  
essential course  
for any therapist  
working with children  
with neurodevelopmental  
delays, a missing piece.'**

**Simona Onnis 2018**

## About Your Instructor

Gill Brooksmith has been a therapist since 1994 and works as a Neuro-Developmental Kinesiologist helping adults and children in the UK, Europe, South Africa and Middle East. She is an International RMTi, Touch for Health and Brain Gym® trainer.
